

## Drum heaters food grade 220°C

IHPs drum heaters in Teflon coated glass fiber cloth is specially designed for use within food processing industry. The coated surface of PTFE is approved for all food processing and follows EU Commission Regulation EU 10/211 and US FDA 21 CFR 177 1550 regulations.

The drum heater is manufactured with quick release bucklers, adjustable thermostat from 20° to 220°C and has four meter connection cable. For good heat distribution and high energy performance the drum heater has a built in insulation of type E-glass fiber.

The drum heater is available as standard for 200 liter drums. We also customize sizes according to specifications.

### Technical specification

Drum heater in Teflon coated glass fiber cloth (PTFE)
Built in insulation of glass fiber (E-glass)
Supply 230V or 110V
Thermostat 20-220°C (0-90°C and 0-120°C available as option)
Class IP40
Double insulated construction for high security
Four meter connection cable
Approved for food processing according EU 10/211 and US FDA 21 CFR 177 1550

### Standard range

Article number	Dimension	Power	Supply	Drum diameter	Drum size
30-HSHP200-1	1950 x 850mm	1800W	230V	ø573 to ø611mm	200 to 210 liter
30-HSHP200-2	1950 x 850mm	1800W	110V	ø573 to ø611mm	200 to 210 liter
