

Base drum heater 150°C

This drum heater is designed as a base heater where the drum is placed directly on the circular heated area. The casing is made of 2mm steel plate which makes the base drum heater ideal for using in tough industrial environments such as warehouses, construction sites and chemical facilities.

The base drum heater has an even heat distribution throughout the heat-emitting surface, has an adjustable analogue thermostat 0-150°C and two meter supply cable.

IHPs base drum heaters is specially designed for melting or to reduce the viscosity of substances such as soaps, fats, resins, lacquer and several oil based products.

This base drum heater can be used together with IHPs other drum heaters and drum insulation jackets.

Technical specification

| |
|--|
| Robust steel construction |
| Power supply 230V or 110V |
| Thermostat 0-150°C |
| Built in insulation 50mm |
| Class IP40 |
| Moister and chemical resistant |
| Two meter supply cable |
| Outer size 880 x 600 x 105mm (L x B x H) |

Standard range

| Article number | Diameter top | Diameter base | Height | Power | Supply | Drum size |
|----------------|--------------|---------------|--------|-------|--------|------------------|
| 30-HBD-1 | ø550mm | ø600mm | 70mm | 900W | 230V | 200 to 210 liter |
| 30-HBD-2 | ø550mm | ø600mm | 70mm | 900W | 110V | 200 to 210 liter |
