

Drum insulation jackets

IHPs insulation jackets are easy to mount, are preformed and fit all 200 liter drums. The insulation jacket is manufactured with flame-resistant polyester and has polyester fiber insulation. The jacket opens and closes easy with Velcro.

During handling drums in industrial environments the insulation jacket reduces energy losses and contributes to lower energy use. The drum can be filled, emptied and moved with the insulation jacket fitted.

This insulation jacket can be used together with IHPs base drum heater.

Technical specification

Outside made of flame-resistant polyester

Insulation of polyester fiber

Opening with Velcro

Moister and chemical resistant

Withstands drum temperatures up to 90°C

Standard range

Article number

Drum size

30-HIJD

200 to 210 liter
