

## Side drum heater 90°C

This heat cuff is a side drum heater designed to fit all types of drums, especially plastic drums, when the surface load in combination with the sewn in insulation requires lower temperature to achieve good heat distribution. The side drum heater is very energy efficient and made of durable material in flame retardant polyester.

The drum heater is equipped with buckles for quick and easy mounting and has an integrated analogue adjustable capillary thermostat 0-90°C. IHP can also offer digital integrated thermostats or sensors for external control cabinets.

Our side drum heaters are currently installed in, among other, the processing industry, food industry, pharmaceutical industry and cosmetic industry and warms everything from fats, oils, resins to food.

We customize the side drum heaters to all sizes of drums and have a standard range for drum sizes 25, 50, 105 and 200 liters.
